✏ ABOUT ME

My goal is to be associated with an organization that provides career development opportunities as a Software Engineer and an environment to enable me to contribute to its growth. I'm good at ERP-based Software Development and Relational Database Management System. I possess good management, and organizing abilities.

In short, my short-term goal is to get a job that will make me feel satisfied with my work and my long-term goal is to get enough responsibilities to do something for society so I can become someone proud of myself.

📂 PROJECTS

January 2024 – January 2024	**QC Circle Management System,** *Associated with Urmi Group* QC Circle Management System is a user-friendly software designed for efficient project management and collaboration. Users can create projects, organize teams under a company, and track progress seamlessly. The system includes features for competition and organizer data, providing a centralized hub for project-related information. With real-time progress tracking, collaboration tools, and robust security, QC Circle ensures streamlined and secure project workflows for enhanced organizational efficiency. Key Features: 1. Project Creation and Management 2. Team Hierarchy 3. Progress Tracking 4. Competition and Organizer Data 5. Security and Access Control QC Circle Management System is a versatile solution that brings together project, team, and company management in a unified platform.

May 2023 – December 2023	**Machine Management system (MMS),** *Associated with Urmi Group*

The Machine Management System is a comprehensive software designed to streamline the management, monitoring, and maintenance of industrial machines and equipment. This system helps to improve efficiency, reduce downtime, and enhance the overall productivity of an organization.

Key Features:

a. Machine Inventory Management

b. Equipment Requisition and Issued Entry

c. Daily Machine Allocation

d. Maintenance Scheduling

e. Reporting and Analytics

f. User-Friendly Interface

February 2024 – present	**Travel Management System,** *Associated with Urmi Group*

The system is designed as a web-based application, utilizing a modern tech stack that includes ASP.NET.

Key technical features of the project include:

- User Authentication and Authorization
- Booking Engine
- Expense Management
- Real-time Notifications (E-mail)
- Data Security and Privacy
- Logging and Monitoring
